

Kanalname einer Axis Kamera auf Dahua Rekorder ändern

Im Axis Web-Interface unter **Basic Setup > Video Stream > Overlay Settings** den Haken bei "include Text" aktivieren.

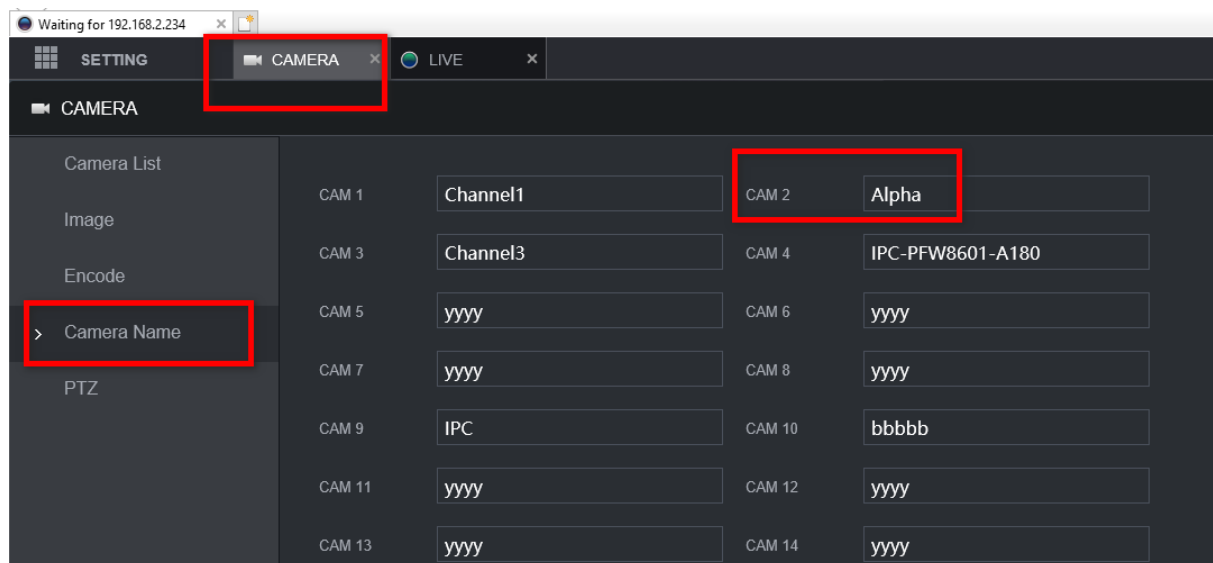

The screenshot shows the 'AXIS M3114 Network Camera' web interface. The left sidebar contains a menu with 'Basic Setup' expanded, and '4 Video Stream' selected. The main content area is titled 'Video Stream Settings' and includes sections for 'Image Appearance', 'Video Stream', and 'Overlay Settings'. The 'Overlay Settings' section is highlighted with a red box, showing the 'Include text' checkbox checked and the text set to 'Alpha'. Other options include 'Include overlay image at the coordinates', 'Include date', 'Include time', 'Text overlay size', 'Text color', and 'Text background color'. A 'Preview' section at the bottom shows a video stream with the text 'Alpha 2021-01-04 16:17:28' overlaid.

The screenshot shows the live video stream from the Axis M3114 Network Camera. The video frame displays a warehouse interior with shelves filled with boxes. The text 'Alpha 2021-01-04 16:17:28' is overlaid on the top left of the video frame. A yellow arrow points to the text. The interface includes a 'View size' dropdown and a 'Stream profile' dropdown set to 'Motion JPEG'.

Die Kamera mit dem ONVIF Protokoll und dem korrekten ONVIF Account (kann im Axis Web-Interface erstellt werden) hinzufügen

Auf dem Rekorder unter **Kamera > Kanalname** den Kanal Namen vergeben (selber Name wie im Axis Web-Interface)
